\u8203 ?To Whom
it May Concern

I am writing in support of the following Development Application

DA2017/1274
Bayview Seniors Housing and Golf Course

The application before council provides a number of important and environmental benefits. The provision of high quality environmentally sensitive seniors accommodation is critical in supporting our aging population. To be able to do this whilst at the same time improving the local amenities and sporting facilities is a win win situation for the local community, golf club members and the residents of the seniors housing.

The upgrade/redesign of the golf course, with increased plantings and improved water management will be an asset not only to golf club members but to the local community as well for many years to come.

Regards,

Terry
