Subject: Development Application Enquiry: N0491/16

I have examined this DA and am unclear on whether or not there is a roundabout proposed for the entrance of the new road at Warriewood Rd. I thought a roundabout at this location, as well as other traffic calming measures, were part of the roads infrastructure upgrades in the Warriewood Valley Roads Masterplan. I and my neighbours, over many years, have had dealings with council about this straight stretch along Warriewood Rd leading to the bend at 70-74 Warriewood Rd. There have been numerous accidents over the years and a fatality in 2012. Some improvements have been made such as double white lines and signage. We have always been told that as the developments occurred along Warriewood Rd traffic calming measures would be implemented. In other streets in the Warriewood Valley land release area the narrowing of the traffic lanes has significantly reduced the average speeds of traffic with a resultant increase in safety. This would also greatly improve Warriewood Rd as well as a roundabout at the entrance of the proposed new road at Warriewood Rd. These measures are needed to make this stretch of road safer by making it difficult for drivers to speed and in so doing to protect the innocent residents, pedestrians and drivers.
