RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

As a citizen of Australia, a taxpayer and a tourist, I wish to strongly object to these plans as a complete overdevelopment of an environmentally sensitive site. It is the job of governments to protect these areas for current and future generations. What is the point of talking about the environment, walkability, neighbourhood character and bio links in a planning scheme if you are not going to protect it? These plans either fit within the planning scheme for the area, or they do not and I expect you to protect this area if these plans do not comply. Otherwise, throw the planning scheme out, as a completely useless document. We humans don't own the planet. We just think we do.
