RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

I have been following the progress of DA1274/2017 on my change.org petition. It just scares me, that development never stops. It never stops to think, it just goes on.

Animals are dying in our drought-stricken West, and it's going to get worse with the heat of the summer.

We need wildlife corridors.

We need them in our thoughts and our planning departments.

It is such a brave thing to do for John Peterson to actually care, and start the petition in the first place about wildlife corridors

If only we all cared like that. If only we were all that brave.

Developers want to make money, but this man wants to make a positive change that can leave options open for the future.

Leaving our options open, when animals need to find food and water, and move about this country freely, doesn't seem like such a bad thing.

The future is a scary place. I think here and now is what's important, with decisions like this.
