To Whom it May Concern

I have concerns regarding the above proposal for John Fisher Park (JFP) these include:

- 1) The ecosystem of JFP is sensitive and a tower may pose risks to the environment
- 2) Issues with compliance to the Plan of Management for John Fisher Park
- 3) The park is public land and I do not believe that the private company has provided sufficient evidence justifying the placement of a tower in JFP.
- 4) The application suggests that the tower will be quite large (25m), and the terminology of 'associated equipment' is too vague - does this mean the development will be larger?
- 5) The development will be an eyesore in one of the few untouched natural strips on the beach. What a shame to ruin Public green space with phone towers.
