RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

The Northern Beaches biodiversity is rapidly disappearing due to local and state government decisions to continue to build unwanted construction in areas which have significant environmental significance.

Our children and grandchildren need to have areas of pristine bushland where they can reconnect with nature, to learn respect for nature so they will want to protect the earth. Children are suffering from Nature Attention Deficit as they spend so much time either at school, in planned after-school activities or glued to computers or phones, with less biodiversity in their surroundings these problems are only going to increase over time. I have seen the life-long learning and benefits young children receive from spending time in the natural environment learning to appreciate nature.

Building units in a high priority wildlife corridor in Bayview is a crime. Please reconsider this proposal and reject it for the sake of our children and generations to come.

We do not own the planet we are merely custodians!
