RE: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101

I have to say I am gobsmacked, shocked and very disappointed with the seawalls appearance... It's an environmental travesty. I clearly understand the need for the seawall but outcome is simply disgraceful to say the least. There needs at least some effort to be made to blend this appalling monstrosity in with the beach and local environment. Please, could it at least have large clean sandstone boulders banked up against the wall to reduce the eyesore and hopefully help with the future sand stabilization. It will only be a matter of time before the great wall will become covered graffiti. Placing sandstone in front of the eyesore will also help prevent some of this from occurring.

Regards from a disappointed local beach user,
Chris
