RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Over-development is a plague affecting so many areas of Sydney, not least the Northern Beaches, risking the community amenity and the values of property. And now the environment. the wildlife corridor concept is itself a minimum - we have already massively damaged our natural environment and the many species we have wantonly killed off. Stop this crazy building and over-building right over the top of the survival corridors which MAY save the species we have placed under such threat. Save the koalas!
