RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Hi there

Due to our exploding human population in recent years caused by increased birth rates and longer lifespans, we have much but mostly ignored practice for conservation and climate action. But it could be DETRIMENTAL to convince people that we have almost no where to live. Now when house prices are high, and builders overworked, this message means that we have to cope with the sad fact about human population explosion and environmental damage. I think the best way is not infrastructure, but stricter birth control practices. Sorry for such objections but thank you for your understanding.
