**RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104**

Madam/Sir. We have on this large island of ours, fauna known on no other land-form.

The whole point in Conservation is variability in the gene-pool. This Development of yours will reduce availability of disjunctive DNA to combine to strengthen these Species.

There will be many arboreal, avian, and ground dwelling species, along with many distinctive reptiles that will reach a point in their population, where entropy is the final step.

This will be due to the the development going forward, that is before you. You CAN do better than this.

Yours, JDW Mullen Dip. CALM. Dip Ag.
