RE: DA2018/0149 - 60 Binalong Avenue ALLAMBIE HEIGHTS NSW 2100

This suburb is a beautiful, leafy family suburb with low density, low rise housing and should be preserved as such. The children have a wonderful safe neighbourhood in which to play outdoors, which is a rarity in this day and age. Any increase in the density of housing will negatively impact the neighbourhood. There is insufficient infrastructure to deal with increase in traffic and parking. Our environment is already under significant pressure and the change in housing regulations will only make that worse. I and all of my neighbours are opposed to any relaxation of development regulations that would allow the creation of boarding houses or similar constructions.
