Subject: Collaroy Seawall

DA2021/1612

Please stop this environmental atrocity going any further. The coastal engineering experts all agree. THERE ARE BETTER WAYS Using nature not concrete!

Today I walked up to the monstrosity and the beach is ALREADY GONE there. It was high tide and very small surf and the water has all but reached the wall.

The damage is being done before our very eyes.

Narrabeen beach is home to multiple surf clubs and board riding clubs. Not to mention North Narrabeen is a surfing reserve. It's now ALL THREATENED. The only people happy about this archaic and dated so called solution are the few private home owners. NO ONE ELSE WANTS THIS!!!! Listen to the experts, listen to the locals. STOP THIS GOING ANY FURTHER. It has already gone too far.

Regards Paul Worsley
