Subject: DA2017/1274

Dear Sirs,

I am writing to object to the proposal to build 95 units on Bayview Golf Course DA2017/1274.

As a local resident I am alarmed that nature is being concreted over so easily for the sole purpose of financial gain by developers and the Golf Course. We choose to live in the area because of its proximity to nature and peace and quiet. Developments of this nature (and indeed Ingleside) cannot be reversed once the concrete is poured. From an infrastructure point of view, the area is already almost at a standstill. Getting anywhere is hard work. Congestion, overdevelopment urban sprawl and no investment in vital services and infrastructure. Is that really the vision for this beautiful part of the world? Concrete, concrete and more concrete???

We are strongly opposed to this development and don't see how it adds to the character or day-to-day life of residents (and taxpayers). That should be of foremost concern to local planners and politicians.

Yours faithfully,

Katrina Hendry (17 Briony Place, Mona Vale)
