Attn: Development Assessment

Dear Sir/Madam,

Re: BAYVIEW GOLF CLUB PROPERTY DEVELOPMENT

Development Application No. 1274/2017 Waterbrook / Bayview Golf Club

I understand that the developer has lodged an appeal in the Land and Environment Court to approve the recently submitted amended plans and to allow the development.

The new plans still cover an area of 5 acres and although the developer has reduced the number of apartments from 95 to 85 there will still be 7 buildings each 3 stories high.

Because new plans have been submitted new letters of objection need to be submitted and this letter is one such.

I share the objections previously lodged by a large number of people.

The new plans do not change the bulk and appearance which are still not in character with the area; it is still going to block a high priority wildlife corridor and remove a minimum 140 trees. This development will be the first nail in the coffin for thousands of nature's creatures which survive today because people like me care.

Please help us to ensure the Land and Environment Court and our Council know there is overwhelming opposition to this development.

Thank you for your support.

Yours faithfully,

Richard White
