**RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104**

Dear Assessing Officer,

As a deeply concerned resident of the Northern Beaches I am not only disappointed and shocked but almost lost for words that a development of this size would even be considered being built in a high priority wildlife corridor.

I would like to ask when is the local government going to draw a line in the sand and decide when enough is enough? How many more trees and species do we need to lose before any action is taken to stop overdevelopment from destroying the environment? What will it take to make the local government realise that our environment needs to be shared with other species and treat them as our equals? They have a right to live too and in the big scheme of things we are all connected.

When is this "have all, take all" mentality going to stop? Did you know that koalas once existed in Avalon? Now they are extinct.

I cannot bear the destruction any longer. Please have some vision and keep any wildlife corridors in tact. Save our trees and leave our wildlife (what's left) to live in peace.

Yours truly,  
Geri Roggiero
