RE: DA2020/0661 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW 2099

I am writing to object and oppose the proposal of a new Optus phone tower at John Fisher Park. This is open public space undergoing rehabilitation. It is a very fragile and sensitive area which the local community groups have been working very hard to preserve. I believe that a 25 metres infrastructure is likely to have a serious impact on the vegetation and the wildlife. Additionally there is potential for adverse effects from the unscientific-based EMF radiation exposure to the local citizens and nature. OPTUS have been here before with proposals and failed. Hopefully they will again be rejected and this will be the last time we have to stand up against them. Thank you for your time with considering these submissions.
