RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

this planned development is not necessary except as a profit raising exercise for the developers. The objections that raised the need for a revision plan indicates that the developers will continue to disregard the conservative view that animals need protection as well as humans and will continue to redesign until the objections die out , then they will use that excuse to develop further . They need to get the message that NO means NO and not until you come up with a better plan. A prime example of such actions is the ADANI mine which is disregarding the native tital land and the continuing objections of the land owners. Do not allow this development to progress
