**RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104**

In my options it is extremely important to preserve every possible piece of land from the use of buildings/houses. This is even more important when a designated wildlife corridor is destroyed or decimated because of construction. The rate of animal extinction in Australia is one of the highest in the world together with deforestation. Native animals have nowhere to go. It is of most importance that his development foes not go ahead.
