RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Dear Sir .

Addressing the issue at hand is it really that necessary that this developer has to destroy this site ,at the end of the argument its all about money .

The better the site the more profit there is in this for the developer only , simple as that .No one else benefits more from this .

The Jobs and growth argument doesn't weigh into this , the jobs are only temporary and at the cost of the wildlife forever.

The developer and shareholders are the only ones to profit from this total lack of respect to endangered wildlife and the everyday taxpayer who is entitled to go out and enjoy a bushwalk and perhaps be privileged enough to see some of this wildlife which in reality belongs to all Australians .

The more you give to this developer the more you take from our wildlife and the everyday Australian .With the current land rate clearance and the alarming number of endangered species growing bigger everyday I am honestly and with respect truly baffled how the destruction of this land can even be contemplated .

We are always hearing how councils and politicians care for there country and the community this is where we see who has more value to the benefit of all , a profit for own self developer or the Australian wildlife which coincidently can only be found in this region , once there gone , there gone for good .

If you have grandchildren do you think they would or would of liked to see these animals in the wild .

Please dont take this land and its invaluable wildlife from all Australians ,present and future .

Thankyou for your time and patience
Peter Yeates
