RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

We continue to reduce the scale of wildlife habitat which commenced with the colonisation of this country as if it had no importance in our lives or that of the diverse animal and bird life which has evolved and diversified within in it for millenia. Our lives would be of lesser value if these areas became silent of the important stimulus of bird song and their sightings if their habitat is replaced by hard surface and tree removal.

Any and all proposed development must be approached with the thought of the place and the importance of natural habitat and its denizens,
