RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

To Whom It May Concern,

I write regarding the council's DA1274/2017.

The area planned for this development is one which I have enjoyed visiting on many occasions over the course of my life.

It is a beautiful area abundant with the movement of wildlife. From what I understand, this area is what is known as a wild life corridor which can facilitate the support of many species whereas developing the area will cause wild life to have their transit areas interrupted.

In turn this interruption of transit places the wild life at greater risk of depleted population or indeed local extinction.

Please can you register my disagreement with this proposal and please can your council show a little more regard to the wild life in your shire rather than the funds you hope to reap from developers.

Regards

Blicka
