

- NOTES
- Extent of adjacent rock seawall from aerial photo (8th June 2016).
 - ICM survey of adjacent rock seawall (March 2018).
 - Tie in works at northern property boundary (Ch. 29.3 - 38.7m) to be undertaken concurrently with lower section of wall by Council (blue section/ separate approval). This will allow the entire seawall to meet the seawall specification (Collaroy - Narrabeen Beach Coastal Protection Works Design Specifications 2016 and as detailed in the drawings).
 - If not achievable, tie-in works will need to integrate with the base of the existing wall within property boundary (alignment may need to be modified on site). Integrity of this section of seawall would be significantly compromised and reconstruction would be required concurrent with future Council upgrades to achieve the required standard.
 - Refer to general notes SSW-00
