RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

I am appalled and very unhappy that once again animals are in last place behind development! It doesn't matter how rare or threatened they may be; it doesn't appear to matter what the professional planners recommend, if somebody has the wherewithall they take precedence. Well, I vote, and I remember. I love to see the bush turkeys and the water monitors around my house, although the kookaburras are now far rarer than when I moved here from Whale Beach.

PLEASE! - stop this unnecessary breach to an established wildlife corridor that means so much to us who love nature, who love the trees, the sky, the waters, the views and the beaches - and the native animals!
