RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

We must retain our wildlife corridors. Over time, we have destroyed soooo much wildlife habitat and wildlife. The animals need, must have a safe corridor to use to travel and keep them safe. Progress is progress but we have a massive obligation to do what is morally right. Animals need this corridor and others around our country. This is a compromise where we can build in some places but not just anywhere and everywhere. What will we say to the future generations when they ask "why didn't you do something?". The chance to make a difference is now so do it.
