**RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104**

I wish to make an objection to thenDA1274/2017 to develop 7 apartment buildings in what is a designated high priority wildlife zone to many vulnerable species. For this proposed DA to ever see the light of day is indicative of how far we have fallen as a community, in protecting our vulnerable species. There is extensive and exhaustive scientific and environmental evidence that such developments negatively affect native and vulnerable species. Really, I frankly can't be bothered arguing all the reasons. Suffice to say I base my argument on scientific facts against this proposal.

'When all the trees are gone, when all the rivers have stopped flowing, when all the birds have stopped singing then we might realise we can not eat money.'

I am very tired of writing submissions appealing against destructive developments. I falsely rely on my elected representatives and public servants to represent the law, the rules, the regulations. I ask that this happens. I ask that the vested interests of developers do not usurp legal frameworks which have supposedly be placed to largely represent the common good.

Do what you are supposed to be doing and not allow regulations to be stretched to such an extent that now such regulations are not worth the paper they are written on. Protect our diminishing wildlife.
