RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Dear Sir/Madam

We have one of the worst levels of extinction on a world wide scale; we are losing so many species of bird, mammal, amphibian, invertebrate and fish because of many issues but primarily through loss of habitat. In this case it is exactly this again, loss of habitat for endangered native species. Please do not sign this important corridor away for the wildlife: it is a stroke of a pen (your pen) that can save this for posterity. I urge you to act for sustainability and for those that cannot speak for their own survival

Regards
Polly
