Subject: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101

To the Council,

As a regular user of the Narrabeen and Collaroy beaches, am writing to disapprove of the continuation of the concrete sea wall further north along the Collaroy – Narrabeen basin. The current humungous wall is not only an ugly eyesore, it has been proven that vertical sea walls have a detrimental effect on the natural cycle of the waves and sand erosion, causing more damage to the environment.

Please re-consider the implications of continuing this wall and look into alternatives that have previously been investigated such as a rock wall of lower height.

Kind regards,

Catrina Hodges
