RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Proposal DA1274/2017 in relation to High Priority Wildlife Corridor in Bayview

I've always regarded Sydney as our premier showcase to the world (sorry, Canberra!); though I now as a virtual retiree live in WA I travelled overseas frequently in my youth, and it was always a thrill to arrive at Tullamarine and know that I'd come back home. It's not just big buildings that make Sydney impressive, or even the Bridge, the Opera House, and the historic precinct, the Domain (tho I am a cultural historian) - it's the natural setting, the magnificent panorama of the Harbour and across the water, the Taronga Park Zoo; and, of course, the carefully thought-out wildlife corridors. To attack these is to destroy the authentic, uniquely Aussie character that makes Sydney stand out from other world-class cities like London, Paris, Rome, Tokyo or New York. DON'T give into the pressure from developers to make a fast buck and cash in on the attractiveness of our nation's largest, most vibrant city by cannibalising her very spirit, or she will become a tragic victim of her own fame!
