RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Wildlife corridors exist to serve the specific needs of animals in moving from one area to another for purposes of feeding and nesting. If this was considered to be important in the past, it may be more important today due to development pressure in proximity to animal and plant populations.

These corridors should be preserved out of respect for the natural world in which we connect with all other life forms, often indirectly.
