RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Wildlife corridors are essential to retain biological diversity and healthy populations. The cumulative impact of these individual projects have seldom -- if ever -- matched the offsets in past cases, and I fully believe this proposal will fall short of measures to protect the ecological community from isolation, inbreeding and ultimately collapse.

I have an interest in the northern beaches, as I am a member of the Northern Beaches Writing Group and spend one weekend a month there for personal gain and to explore the bush.
