I understand that there will be a vocal group against this tower being erected. As there has been in previous attempts. I would like to submit in favour of this tower going ahead. Living in close proximity to this area my family and I would benefit greatly from the improved mobile phone reception. We currently have very poor reception and sometimes non at all. I would like to close my landline number but I have to keep it because of the lack of mobile reception. We have tried all the major telcos with no luck. We NEED this tower.
