**Subject:** Objection to DA2017/1274

To whom it may concern

I object to DA2017/1274 for the following reason:

Putting this over height development right in the middle of the golf course will totally destroy the wildlife corridor.

I lived at Waterfall Cottage in Cabbage Tree Road for 37 years. The joy of being there was the abundant wildlife particularly seeing the Powerful Owls untroubled by human disturbance. This development would completely destroy the wildlife corridor – the wildlife has so few places to escape to - where would it go. The way things are going – there will be nowhere to go

One of the fabulous things about the Northern Beaches is the fact that it wasn't over developed but that seems to be rapidly changing. Don't the members of the Council care, do they realise birdlife like the Powerful Owl, Lyrebirds, Kites and many other rare and endangered birds will be extinct if this over development madness doesn't stop – how sad that your grandchildren will only be able to read about the things, that you have the privilege of seeing now, will only exist as pictures in books – you, as the councillors are the people responsible for making this happen or stopping it.

Surely there must be some members of the council that know that the Eco Report suggesting “dimming the lights” so as not to disturb the bats is just a load of nonsense.

On the Council website it says

*The Northern Beaches is a unique location and we're ensuring appropriate development controls keep it that way.*

What rubbish – that's just advertising B...S... if you allow this development to proceed.

**YOU GUYS ARE THE ONES WHO CAN STOP THE DESTRUCTION OF THE FABULOUS AREA CALLED THE NORTHERN BEACHES!**
