**RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104**

Wildlife corridors with mature, remnant trees are vital not only for the lives of the floral and fauna which survive there, but also for the humans living around those corridors. Squeezing out, shattering the corridors has negative mental health effects on humans as well as pushing more of our native flora and fauna towards extinction. Once the remaining remnant trees are bulldozed, the bush cleared, there is no going back. Extinction is forever. Human health is inextricably linked with the health of our local environment. Keep it all healthy.
