**RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104**

Dear Council,

Please desist from any development in current and proposed wildlife corridors. The health of flora and fauna depend on it and the quality of life of every human needs these places and reminders for mental health, well-being and quality of life. While writing from Victoria, I'm a farmer whose invested heavily in these corridors for the rights of future generations, to buffer agricultural production in the face of global warming and to provide future linkages to urban centers through walking and bike paths. Think of the current and future and rein in greed and self-interest.
