Subject: Opposition to DA2017/1274

As a resident of 4 Barkala Rd Bayview, NSW 2104-

I am writing in opposition to the DA2017/1274.

I have significant concerns on the ecological and environmental impact on numerous native species as either endangered or vulnerable, including the powerful owl, micro bat colony and black cockatoos within the high priority wildlife corridor.

Destruction of habitat within the wildlife corridor and providing provision for regeneration/reforestation will not provide a safe haven for ecologically threatened species that are of listed significance.
