RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

I object to this development proposal. This application is contrary to the surrounding amenity of the area in which it is proposed which comprises low density residential an open space. In addition, the impact on endangered species within the existing wildlife corridor are great enough to materially effect their continued survival. The loss of habitat for fauna using this land for foraging and egress will go beyond the removal of the proposed 140 trees as the footprint of the proposed dwellings and the use of the surrounds by people , their cars, their pets will diminish further the existing range of existing wildlife
