RE: DA2021/1612 - 1 Clarke Street NARRABEEN NSW 2101

I am writing to object to the sea wall under construction at Collaroy Beach. I object because it will not stabilize the sand. We, the public will loose the beach, as has occurred in many other countries that have chosen this method of sea wall construction. It is to protect private houses that need to own their own building risks and not be funded by the public budget. The beach was there first not the houses. The beach is for all, and it should not be put in jeopardy for an experiment. There are many places in the world that have had disgusting sea walls built and the ocean just hits them and there is no beach.

Please reconsider before it's too late and stop this eyesore from continuing.

Regards
Angie Green
