**RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104**

More and more habitats for wild life are being eroded even outer suburbs that once had large gardens full of trees and shrubs are changing to large homes and apartments with little greenery, and (heaven forbid), plastic grass. So it is more imperative than ever that wild life corridors are protected so that other species can survive and be part of the chain of life that is so crucial to the planets well being. Life is a pyramid and we occupy the top level, if the lower chains collapse so do we. We share a space and economics should not be the prime driver of decisions on how we use it, life doesn't make a miraculous come back after poor decision making there is no government to bail out environmental collapse when your gone there is no coming back.
