**RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104**

While I don't live in the area where this project is proposed I still feel compelled to object to the destruction of all wild life which is impacted because of progress. Progress should show a comprehensive study on the impact to wild life, which in essence is done BUT it is done in such a way that in always in favor of the Developer. It is a very one sided study, even though independently done. The person, or persons who pay for that study always has the advantage. The poor animals don't have a chance, only our voices to fight for their lives.
