Subject: DA 2021/1612 Submission

Submission.

In my opinion any further construction/extension of the Collaroy/Narrabeen seawall needs rigorous exhibition for community consultation.

The beach is NOT exclusive use to beachfront property owners & all proposed construction should NOT be hidden behind current planning policy.

This information should be displayed for the community to consider.

Northern beaches council & NSW state government planning should reconsider their approach to planning around properties that directly impact Narrabeen/Collaroy beachfront.

I believe the current consultation is not appropriate as the neighbouring properties are also considering protection by the proposed Seawall.

Please make this process transparent immediately!

The community has come together with the second Line in the sand protest on 27th of November 2021 but unfortunately Northern Beaches Council, you are not listening.

I am totally opposed any further extension of the seawall. I am a surfer who grew up surfing at the beach over the last 40 years & have seen the impacts of large storm events but believe their is a better way to look after the beach.

This beach is too important to be left to short sighted policy, make the planning transparent & let's get it right now!

Best Regards

Matt Hardy

Narrabeen Resident
