RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

I object to the building of 85 units in the middle of an important wildlife corridor. This is not ordinary land, and any development, regardless of supposed sensitivity to wildlife, will disturb the living and breeding of a wide variety of animals and plants through its noise, smell, destruction of natural habitat and feeding needs etc. The needs of developers to create profit are surely second to Those of voiceless nature. This environment must be kept so the next generation can experience the biodiversity of the Northern Beaches.
