RE: DA2017/1294 - 15 Lawrence Street FRESHWATER NSW 2096

In reference to DA2017/1294. I object strongly to this Development.

Firstly, I and many other owners/residents in the neighbouring area of this DA were never notified of the proposed development.

Secondly, how could a development be built so close to an electrical sub-station? If the workers can only be working inside the area of the sub-station for 15 minutes only, how could a building be built next to it?

The electromagnetic field of electricity would pickle an adult's brain and it would also endanger the life of a child or baby. This DA cannot be approved as the vehicles from this new property should not access Lawrence Street. The traffic on Lawrence Street is already congested without adding another 24 vehicles exiting or entering this new property.

In summary, this DA is flawed and is dangerous and cannot go ahead. PLEASE DO NOT APPROVE FOR OCCUPATIONAL, HEALTH AND SAFETY REASONS. IT IS ABHORRENT AND NOT NEEDED IN FRESHWATER. 7LHV93
