RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

I absolutely object to DA1274/2017 to develop 7 apartment buildings in the middle of the designated high priority wildlife corridor home to many vulnerable species. I understand this area to be Biodiversity land and should not be destroyed by this development. What outrages me further is that the federal government has just launched an inquiry into endangered species (extinction crisis). CRISIS is the word used, just to make it clear. How many more native animals will be added to this list if this development proceeds? If government's keep this up, they will have NO voters at all.
