RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Wildlife corridors MUST be maintained in order for our native animals to coexist with us. To continually destroy these areas of bush land will impact directly on the local ecology. These facts have been investigated and confirmed with previous assessments across the country. This is not an emotional plea; this is FACT. To destroy this unique area will have massive ramifications on the entire region. The native wildlife will not be the only loser in this instance. With the continued loss of Green Space in suburbia there are limited areas for families to enjoy even LOOKING at trees such as these, let alone the vista the entire area creates.
