RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

I'm a retired biologist and I understand deeply the need for unbroken High Priority Wildlife Corridors. A single break in the chain can lead to knock-on consequences, which are permanent.

Contribution to species loss (directly or indirectly, probably slowly) is a real possibility. It sometimes doesn't take much for a species currently 'okay' to become 'at risk' or 'endangered'.

These corridors are vital. Their creation in the first instance was wise, long-sighted.

The loss of them for short-term profit to a very few is unconscionable.

Please block this development forthwith.

I don't object to development; urban renewal, reclamation of damaged lands, all of these options are open for exploration.

This particular one is 'simply bad' and I ask you to block it forthwith, despite political and lobbying pressures.
