Subject: Submission - Waterbrook Development Application No: DA2017/1274

Dear Sir or Madam

With regard to the above application, I submit my letter to join those approving the development.

From a wildlife point of view, it is my experience that any re-planting and wildlife corridors that are planned will assist the native animals and insects, flora and fauna to recover and indeed quickly flourish...I understand this re-vegetation is indeed part of the plan.

As the daughter of an octogenarian who thrives on her golf, this club keeps her connected to her community and energised, helping her to maintain a healthy outlook on life. Long may this remain.

Please allow this DA to be approved and allow the club the go-ahead it needs to stimulate it's members. There will be many more baby boomers coming along who will be using both the golf course and the proposed accommodation in the future.

with thanks
Jenny Ower
