RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

It is inappropriate and completely irresponsible to allow development in s designated wildlife corridor. These corridors were set aside for a purpose- to help preserve our threatened wildlife. These corridors are as important to native species as national parks. Why create them if they are to be destroyed at the whim of developers? The increase in traffic from a development such as this in this area will lead to a big increase in roadkill, compounding the problem for the animals.

The existing infrastructure, especially roads, will be overstretched by the extra traffic, not being designed for these volumes and quality of life will be affected in the area, apart from the harm to wildlife.
