RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Having been involved with the local wildlife in the area from Ingleside to Newport for almost 50 years I am well aware of the adverse effects of cutting off migration routes on the genetic pool of local species, with small groups isolated by the destruction of routes. We need more wildlife corridors, not less. The Bayview development proposal should not go ahead.
