RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Our natural environment must be preserved, both plants and animals in order for our planet to be healthy. Otherwise Australia will become a land of concrete for our children. These things can't be undone. We must preserve these natural corridors for future generations, not cater to developers and short term gain. Our children will not forgive us for how we've degraded our planet.
