RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

OBJECTION TO DA 1274/2017 Please block any attempt to build in the High Priority Wildlife Corridor in Bayview. This is Biodiversity land and home to many vulnerable species. As such it must be protected, for the sake of not only the local native wildlife but the ecosystem at large. After generations of indifference to the environment, Australians are finally waking up to the irreversible consequences of endlessly clearing land and building on it. Once it's gone it can never be retrieved. Please block this development now. Secure the Wildlife Corridor so there will always be a safe haven for wildlife in Bayview and a place for future generations of human beings to experience the beauty and wonder of the natural environment first hand, not just in history books!
